This case sealer can apply a range of tape sizes and comes with a standard 2 inch taping head, however a 3 inch taping head can be easily interchanged for wider tape applications up to 3 inches. This sealing machine can be used in industries where mixed box sizes are common, such as manufacturing and distribution centers. The photo eye detection responds quickly to cartons of different widths, allowing production to easily continue. Our case sealer is also built with an electromechanical height adjustment for precise application. Additionally, this case sealer comes with a centrally located emergency stop, dual masts and an infeed conveyor. If necessary, you can also add supplemental parts, such as an exit conveyor, locking casters, low tape indicator and a light indicator. Step Ahead of the Competition Today, companies need to be fast and flexible in every phase of their operations, including endofline packaging. By joining the PDA, Korpac will increase its national footprint while

also maintaining a laser focus on our customers. Unfortunately, many people don't know how to properly wash their hands and when they need to do so. That's why we put together this guide. Fortunately, we've put together a simple 3 step test you can use to determine if your 3ply masks are real or not. Hats off to our team member, and thanks to all of our customers! We've been preparing our packaging company to deal with the changes and wanted to share some tips with you for how you can prepare your business for the COVID19 pandemic. http://www.speedski-cz.cz/userfiles/fckeditor/crock-pot-saut-countdown-slow-cooker-5_7-lit-re-manual.xml

That's why we're going to go over the history of ecommerce and also the evolution of ecommerce packaging. Let's look at some popular types of Ecommerce packaging. Let's look at why POP displays are so effective and some of the many types of displays you can utilize. A professional grade case sealer can greatly increase productivity and reduce costs. Packing and shipping is a major cost for many businesses, but with the right packaging equipment, you'll be able to increase performance without sacrificing quality. At up to 40 cases a minute it is easy to see how quickly our 3MMatic sealers provide ROI return on investment. This consistency also keeps your box sealed and prevents your products from getting damaged in transportation or arriving to your customer in poor shape. Korpac has trained authorized 3MMatic service technicians on staff to assist with installation and preventative maintenance of our sealers. We offer only the highest quality products and are familiar with every piece of equipment we sell. When it comes to troubleshooting or maintenance, you can rely on Korpac. This could mean providing preventative maintenance to ensure that all of your packaging machinery is in good working order. If we uncover a problem or broken component early, we can often prevent expensive future repairs. That's why we offer machine repair services 24 hours a day. With our emergency services, we can usually dispatch a trained technician to your facility within 4 hours. By joining the PDA, Korpac will increase its national footprint while also maintaining a laser focus on our customers. Which, sometimes means going the extra mile literally. In the early 1990s, on a hot summer day in Columbus, OH, Art, then an employee of a local packaging supply company, received a call from a customer who had run out of packaging peanuts and therefore, were unable to ship any orders. With stock located over 100 miles away, his customer was facing a shut down situation. Art recognized the impact this could have on his customer and went to work exploring any and all options. Stock could be delivered the next day, but that wasn't good enough. Art decided to purchase some product from a local competitor and strapped it onto the top of his car. He recalls driving about 25 mph on back roads to his customer's location. Needless to say his customer was extremely happy and was shipping packages with almost no downtime. Art on right going the extra mile for his customer. Art has instilled these same values in everyone here at PacknTape and our everyday activities. You can rest assured our experts will work to understand your business's priorities and processes to ensure you get the products you need, when you need them. With extra lead time and direct access to the latest and greatest in 3M products and pricing, we are poised to help you keep your business on the cutting edge. Understanding We have dedicated 3M Strategic Account Specialists on our team, ready to provide personalized solutions for even your toughest applications. Our Specialists receive specialized product training at 3M headquarters and work closely with 3M's local product specialists. Our entire sales staff has access to online and fieldbased training as well as enhanced product information. These resources give us an understanding of 3M product solutions you won't find anywhere else. Our onsite expert works to understand your business's priorities and processes, so you get the solutions you need, when you need them.

Confidence In order to partner with 3M as a Strategic Distributor, PacknTape has demonstrated our company's strength and our commitment to providing ongoing support to our customers. We are dedicated to bringing you value for the long haul. When product is available, ground orders typically ship after a 3 business day warehouse processing time. Air orders typically ship same day if orders are entered by 1100am Mountain Standard Time. If you are shipping to a new address, please allow 1 day extra for shipment account setup. These are estimates and could change if special circumstances prevail. Shipping Errors Customer must notify us within 14 days of receiving product if there is a

shipping error. Incorrect Address Be sure to pay close attention to your shipping address information on the checkout page. The customer is responsible for providing correct shipping address information. If an order is shipped to an incorrect address provided by the customer, the customer takes full responsibility to retrieve the package or will be responsible for the full cost of the items shipped. Pricing All products on this site are sold for profit>Returns cannot be processed without an RMA number. When returning products, we strongly recommend the use of a carrier that can track packages. You also assume responsibility for insuring the returned item. A minimum restocking fee of 25% or more, depending on the item, manufacturer policies, and circumstances. Return shipping is at your expense. If any of the product has been used and not in resalable as new condition, we cannot issue you a refund. Made to order items are NOT returnable. PacknTape must be notified within 14 days of receiving material for return authorization. Only stock items are returnable depending on manufacturers policy. All products are sold with their respective manufacturer's warranties. Please note that warranty periods and services vary by manufacturer and product.

NOTE If a customer ships product outside the USA all warranties are void and no returns are accepted regardless of circumstances. Shipping Errors Customer must notify us within 14 days of receiving product if there is a shipping error Defective Merchandise If a product is suspect of being defective, only a portion of the suspected product may be returned until the factory completes required testing to determine if the product is within specification. PacknTape will pay for the shipping charges but it is the responsibility of the client to package the product in a suitable fashion. If the product is found to be defective then arrangements will be made to return the product. After the product is checked in and inspected a credit will be issued to the card used to purchase it. Cancellation Policy Once a customer completes the checkout procedure and the order is processed it cant be cancelled. At this point the customer must follow our return policy. If a customer refuses shipment of an order placed online, no returns will be accepted. If the customer changes their mind about an order they must go through the return policy. Incorrect Address Be sure to pay close attention to your shipping address information on the shopping cart page. The customer is responsible for providing correct shipping address information. If an order is shipped to an incorrect address provided by the customer, the customer takes full responsibility to retrieve the package or will be responsible for the full cost of the items shipped. Pricing All products on this site are sold for profit.We hope you enjoy shopping at PacknTape. These highdemand products include, but are not limited to, the following gloves, sanitizers, disinfectant chemicals and wipes. Products ordered now are considered firm commitments to purchase and are considered noncancellable and nonreturnable. Orders cannot be cancelled and the product ordered cannot be returned for any reason other than a manufacturing defect.

We will make every attempt to meet your requested needs, both during this crisis and for many years in the future. We appreciate your understanding as we all work to get through these challenging times. Pollock Orora Where Solved Happens. The 77A is manually adjustable to a wide range of box sizes. It is a continuous duty hot melt glue case sealer unmatched for compactness, quality of construction, safety and operating performance. At 58 inches 1,473mm in length the BEL 270 is the most compact automatic hot melt glue case sealer available. BEL automatic case sealers feature BEL's Snap Folder safe flap folding technology. The BEL 270 hot melt glue case sealer is userfriendly and very simple to operate. A case size change can be completed from either side of the machine in under one minute using two hand wheel adjustments. The system seals cases with a gap free top closure on regular RSC cases providing superior dust and light hold out qualities. It is a compact, versatile case sealer for top seal only or top and bottom seal. When your products require pressure sensitive case sealing, the WST is the perfect solution. Providing quality case sealing equipment, Wexxar's WST works hard to give you a fast, easy manufacturing experience. Enjoy features on this equipment that provide your cases with safe, effective sealing. Not only will your

products benefit from the WST, so will your production lines. By keeping the intake and outflow of this machine in line with the rest of the line, aisles are kept free, safety is improved, and space is saved. With a small footprint, using this equipment is easy and safe. Since no compressed air is used in this process, it greatly decreases contamination and is more durable than vacuum cups which can clog and wear. As long plow rails aren't used, the overall length of the machine is significantly more compact. This allows a constant pressure to be exerted on the case, despite normal variations in case width.

Even heavy cases are handled carefully and with great control. The BEL 150X oversized model has all the quality features of the BEL 150 pressure sensitive case taper with the added bonus of a larger frame and drive system for large case capacity. The height and width adjusting mechanisms have locking movements for safety in case of sudden air loss. The adjustments can also be fixed in position for sealing a series of uniform size cases. Cases are taped top and bottom with either 2 or 3 wide tape using Dekka stainless steel tape heads. Ideal for continuous, multiplesize case operations, the BEL 185 case sealer automatically sizes independently to each case, eliminating the need for manual adjustments. It also converts to a fixed position sealer for uniform case sizes. The superior performance and safety provisions of the BEL 185 offers operator comfort and increased productivity above that of similar case sealers. With the design and construction will deliver years of reliable, low maintenance performance. It's innovative design emphasizes safety, simple operation and rugged construction all contained within the smallest footprint of any fully automatic case taper. The exclusive BEL Snap Folder folds top flaps closed automatically without using dangerous rear flap kicking arms. The BEL 250 case taper is the premier model in the BEL line of case tapers and its sturdy corrosion resistant construction will provide years of dependable performance in high demand production environments. It is an affordable high quality fully automatic case taper that offers highly advanced production duty design. No other brand of automatic case taper compares with the BEL 252 for compactness, safety, quality of construction, operating performance and value. Quick three step size change with simple hand wheel and clamp adjustments enable the BEL 252 to seal a wide range of case sizes.

This automatic case sealer also features a very compact design that allows it to fit easily into existing packaging lines. If Your Production Requirements Include Combining Multiple Production Lines And Processing Cases Of Varying Sizes Interpack offers a UA Series automatic case packing machine for every application and budget. Interpack can customize to specific requirements such as line voltage, operation range or 4flap pickup assemblies. This configuration provides maximum stability since it applies force to the strongest areas of the case which is in the direction of the fluting of the corrugated. Minimizing force is applied while the case is processing. This style processes the widest variety of case dimension but certain narrow width cases may be better suited on side belt drives. This side belt drive random case sealer contains the same package of features and benefits as the standard sized RSA 2024SB. Construction is reinforced to handle the larger, heavier cases. Standard 4 tall drive bases provide twice the gripping power. It will "capture" the case between moving side belts as it propels it past upper and lower tape heads and as such, is ideal for presealing the bottoms of empty cases prior to packing. Side Belt Drive is the preferred method of processing narrow width cases. Interpack's digital pneumatic system retains the upper head after each case to improve throughput speed. A pneumatic infeed gate assure proper case position during processing and reduces jams. Check the features, check the construction, then check the price. The decision will be easy. This configuration provides maximum stability since it applies force to the strongest areas of the case which is in the direction of the fluting of the corrugated. Minimizing force is applied while the case is processing. This style processes the widest variety of case dimension but certain narrow width cases may be better suited on side belt drives.

This machine has features unsurpassed among its competition. With the widest operating range and

the most powerful belt drive, this machine is the choice for round the clock applications. The case is carried past the tape heads on the tops of twin bottom belts. This style requires some downward pressure from the upper head assembly to propel it past the tape heads. This requirement may make it unsuitable for lightweight, unstable, void filled or narrow case sizes. The USA 3036SB has the power and construction to handle large, heavy cases. This machine is ideal for low to medium production volume. This machine still has many of the features of our standard line This food grade stainless steel, NEMA 4 rated machine is just the answer. Other uses include sealing full telescopic style cases. Inclined rollers at infeed help keep case down on conveyor bed. Supports 12 mm to 36 mm tape width capacities. Machine dimensions 31 inches long x 11 inches wide x 29 inches high. In keeping with the tradition of customerorientated product development, the LDXRTB was designed using enduser feedback to provide solutions to the most common case sealing obstacles. Utilizing CaseLocker™ 60 tape cartridges, allows the case sealer to process cases at significantly higher speeds than competitive case sealers. Contact Loveshaw for details Designed to meet the case sealing demands of customers with high volume runs of the same box size. It's compact design is perfect for customers looking to take up less real estate between conveyors. Repetitive motion is reduced and productivity is increased with this innovative design. The Ld16A Requires Little Maintenance And Easily Adjusts To Run Boxes Of Another Size. Box adjustments can be made in less than one minute. Plug in operation, minimal operator training make this compact, 77. Also available in Bottom belt and Side belt. The Ld3Sb Uses Pressure Sensitive Tape And Incorporates Drive Belts On Both Sides The Box.

The Ld3Sb Tapes Boxes From 3" To Inf. The LDXss was created to meet an increasing demand for a case sealer that could remain in line while plants were being washed down. Contact Loveshaw for details. All rights reserved. Please upgrade your browser to improve your experience. This machine has gear motors for less noise than conventional models, suitable for quiet workspaces. The packaging tape machine is ideal for many industries including manufacturing, logistics, winery and food and beverage. These tough and reliable automated case sealing machines provide economic automation for a wide range of case sealing needs, from startups to large companies. You must have JavaScript enabled in your browser to utilize the functionality of this website. You can simply remove the item from your cart. You have no obligation to purchase the product once you know the price. You can simply remove the item from your cart. Park, Boghall Rd, Bray, Co. Wicklow. Whether your requirements are adjustable, random or productspecific, 3MMatic Case Sealers offer a solution to meet nearly any application. Each of these solutions offers a unique benefit to your operation and can improve productivity and efficiency. A heavy duty gear motor provides power to the bottom belt drive, and adjustable side guides position and align your boxes for quick and easy throughput. With a 16gauge welded steel frame and epoxy paint finish, it is engineered for shiftaftershift productivity. A height adjustment crank raises or lowers the taping head to adjust to box height and compression rollers position the top flaps of each box for precise sealing. Dual masts include twin lead screws for stop relocation and stronger taping head stability. It can be quickly shut down using the centrally located emergency stop switch. To change box configuration, simply readjust height and width to accommodate the new case size. This is called a "C" clip application. The taping head cuts the tape as it is being applied.

After the box is securely sealed, it exits the case sealer. Taping heads usually function in pairs to tape two seams of a case. When they tape the top and bottom, taping heads are mounted in an upper and lower configuration. Taping heads can also be mounted for sealing a case lying on its side. In the end, our technologies help customers like you deliver competitive products to the market faster and more efficiently. This adjustable case sealer comes equipped with a springloaded, side belt drive designed for narrow profile boxes. In addition, its easily accessible, sidemounted, height adjustment handle and reference ruler make height adjustments simple and its rugged, dual extruded columns offer smooth incremental adjustments. We constructed this side belt adjustable case sealer with a

16gauge welded steel frame and powder coat paint finish for longlasting durability. Optional features include Infeed and exit conveyors, locking casters, low tape indicator and box holddown attachment. This side belt case sealer gives manufacturers and distributors the packaging flexibility and speed to meet the competitive demands of their industries. This case sealer can apply a range of tape sizes and comes with a standard 2inch taping head, however a 3inch taping head can be easily interchanged for wider tape applications up to 3 inches. This sealing machine can be used in industries where mixed box sizes are common, such as manufacturing and distribution centers. The photo eye detection responds quickly to cartons of different widths, allowing production to easily continue. Our case sealer is also built with an electromechanical height adjustment for precise application. Additionally, this case sealer comes with a centrally located emergency stop, dual masts and an infeed conveyor. If necessary, you can also add supplemental parts, such as an exit conveyor, locking casters, low tape indicator and a light indicator.

The machine is designed for installation adjacent to a conveyor system or on a stand for offline systems. In the end, our technologies help customers like you deliver competitive products to the market faster and more efficiently. The machine is designed for installation adjacent to a conveyor system or on a stand for offline systems. In the end, our technologies help customers like you deliver competitive products to the market faster and more efficiently. With expanded box size capacity and interchangeable taping heads, this rugged sealer allows you to change as your business changes, boosting your productivity, cutting your costs and keeping your business profitable. The taping heads help maximize production flexibility while the dual extruded columns allow for smooth incremental adjustments. Plus, the easily accessible side handle and reference ruler also help adjust for a wide variety of case heights. The auxiliary offset taping head position provides flexibility in the sealing process for shorter boxes. Enjoy the benefits of our durable case sealer for exceptional results! This is called a "C" clip application. The taping head cuts the tape as it is being applied. After the box is securely sealed, it exits the case sealer. When engaged, the drive belts will stop if there is not a continuous flow of boxes through the machine. Inserting a box will restart the machine. A height adjustment crank raises or lowers the taping head to adjust to box height and compression rollers position the top flaps of each box for precise sealing. It can be quickly shut down using the centrally located emergency stop switch. Then simply adjust the height and width to accommodate new size. An integrated box gate indexer with adjustable pressure and height helps to separate boxes from a flooded infeed conveyor while the safety interlocked hinged access doors with steel screen allow easy viewing of case flow.
