cell phones, two-way radios, etc. If a malfunction occurs, shut down the machine. Remove the unit from service and notify the proper authorities. Always return switch to neutral and stop before moving the switch to the next function. Operate controls with slow and even pressure. Do not wear loose fitting clothing or long hair unrestrained which may become caught or entangled in equipment. Attach only one 1 lanyard per lanyard anchorage point. Use extreme caution when entering or leaving platform. Ensure that the platform assembly is fully lowered. Face the machine when entering or leaving the platform. Always maintain "three point contact" with the machine, using two hands and one foot or two feet and one hand at all times during entry and exit. One foot additional clearance is required for every additional 30,000 volts or less. The minimum approach distance shall be reduced to a distance within the designed working dimensions of the insulating barrier. This determination shall be made by a qualified person in accordance with the employer, local, or governmental requirements for work practices near energized equipment. Do not exceed the allowable sideslope and grade while driving. Do not tie off machine to any adjacent structure. Never attach wire, cable, or any similar items to platform. Use cranes, forklift trucks, or other appropriate equipment to stabilize machine. Travel grades in low speed only. Disconnect power to overhead cranes. Position barricades on floor if necessary. The platform must be completely empty of tools. Lift the unit with equipment of adequate capacity. Additional precautions to be observed during

machine maintenance are inserted at the appropriate points in this manual and in the Service and Maintenance Manual. It is of utmost importance that maintenance personnel pay strict attention to these precautions to avoid possible injury to personnel or damage to the machine or property. <http://dochoiotovn.com/uploads/userfiles/cambridge-640a-v2-manual.xml>

A maintenance program must be established by a qualified person and must be followed to ensure that the machine is safe. Wear gloves to help protect hands from spraying fluid. Ensure adequate support is provided when raising components of the machine. Ensure that battery acid does not come in contact with skin or clothing. Consult local regulations for further requirements for aerial work platforms. The frequency of inspections and maintenance must be increased as necessary when the machine is used in a harsh or hostile environment, if the machine is used with increased frequency, or if the machine is used in a severe manner. Use the Service and Maintenance Manual to perform inspections. Report any leakage to the proper maintenance personnel. Make sure all illegible decals and placards are cleaned or replaced. Ensure hydraulic oil is added as required. Refer to Section 4 for more specific instructions. Continue to the right counterclockwise viewed from top checking each item in sequence for the conditions listed in the following checklist. Latch, stop, and hinges in working condition. Inspect wheels for damage and corrosion. No evidence of loose bolts or looseness between bearing and machine.
