Pajo I., 09.01.2019 Bought it for small theater 67 months ago, with 12 theater spots, 3 profile spots and 4 PAR cans All the lights are LED. It runs them beautifully, never had a flicker which means it has a strong and clean DMX signal, enough room for more lights, even for manual control. The sliders and buttons are firm and precise and there are even more options then I need for this type of use timings, audio input, MIDI, fog machine control etc. The only drawback is that you cant save combinations on a external card or usb, so when 4 pages of savings are used, I have to rewrite them again, which is a issue if you have repertory program. Otherwise, recommended with full heart. Send report Total features handling quality Rask23, 17.12.2019 Simple and easy to handle. Some Midi controller allow you to change the message sent in the settings but not this model. Kind regards Kind regards Could I map through DVC 4 gold. It has only midi input. Is it possible with a usbmidi cable to use the command as a midi controller. In the order book we have some midi notations. I use the program for a long time but now I thinking about to take another program If two MIDI devices are set to the same MIDI channel, Daslight cannot differentiate them. Its like the devices were cloned. As far as I know, the APC 20 and APC 40 do NOT have a MIDI setup to change their channel. Unfortunately, it will be the same issue with any other software ! It's a little tricky to get it programmed at first, but once it's there it runs solid. Todd Style by phpBB3 styles.
