Well, my 50 year old sewing machine could still sew, but I could no longer lift it and had to resort to sitting on the floor if I needed to sew. So I decided it was time to say goodbye to dear old Bessie. First project that I tackled was to make 2 soft sided travel totes, which I copied from a popular manufacturer. See attached photos. All work, including the quilting and the piping were done on my new Brother, except for a small portion on the inside that was easier to sew by hand. I had to resort

to reading the manual on several occasions, but quickly learned that. I bought it specifically for my 11 year old daughter, who wanted to start sewing doll clothes. I am all for her sewing, and am excited to teach her how I teach sewing and have since 2002, but I wasn't excited about the thought of her monopolizing my Bernina 930. I decided on this Brother not only because the price was right, but I have had experience with just about every machine created yeshand cranks to the extreme highend embroideries and everything in between that a student can bring into class, and have found any Brother model I have dealt with to be reliable, easy to use, and simple. It is basic but has enough added features to experiment and be creative. Nice buttonhole, too. It is very light weight, but does not have a. The general feeling among people I know who sew is that the Brothers are not as durable or troublefree as other makes and I can say, my Brother had problems out of the boxmissing parts but for the money, this is quite the machine. If you have a beginner sewist at home, this machine could really encourage creativity. Or if you yourself sew small projects and kids clothes, there is a lot here to like. These can be used to create the effect of handsewn clothes or dress up simple patterns by putting these small ornamental stitches along seams and across plain parts of clothes. For machine quilters, the feather stitch or other decorative stitches can be used over seams or. Mostly hate.

I would be practically begging it to finish one little row of stitches without problems. But, it hated me. I cursed at it a lot. However, this new Brother machine is so easy to use, so easy to thread with the automatic threader, bobbins are easy to make and it makes sewing such a pleasure. I was sewing 10mins after I opened the box. Im not a professional nor have I had much practice but this machine is pretty much dummy proof. Its really quiet too. I can still hear the tv in the next room while Im sewing. Im currently recovering my outside patio cushions and I havent had a problem yet. The instructions are easy to follow. Another thing is. full review I have sewn many things over the years. I was given the Brother CS6000i for Christmas. It had defective parts. I contacted Brother and they were not much help. All I needed were replacement presser feet because what was included was defective. Brother was telling me all about thread tension and could not see that I knew what I was talking about. It was frustrating. On the other hand, Amazon has been amazing. This was a gift and Amazon tried their best to make my experience with them the best it could be. Amazon did not fail. After much browsing, I was able to settle on this one for its features and price. I have this as a replacement machine and I couldnt be happier. I. full review So far, I am VERY pleased with this machine. Loving embroidery, I decided to purchase the Brother SE400, as it had all the features I wanted and it was within my price range. Prior to my purchase, I read all the web reviews I could find on the SE350, as there are barely any reviews yet for the SE400 new on the market. Noteworthy is the fact that the SE350 and the SE400 are the exact same machines except for the additional computer connectivity that the SE400 possesses. The SE400 has a port for computer connectivity and comes with a USB cable which helps connect directly the sewing machine to your computer.

This is an advantage over the SE350 as this feature allows you to upload. Its still going strong but does show its age. Last spring I bought the Brother CS6000i as a new treat to myself, so when the Brother Project Runway CE7070PRW was offered to me I was very interested in seeing the difference. Both machines are very similar, including in price. Its easy to move them from table to box and back again. Theyre amazingly quiet too. Lots of decorative stitches that are so fun to use, the CE7070PRW has 10 more than the CS6000i. I love the drop in bobbin that they both feature. That is a HUGE improvement over the old XL3022. The automatic threader is fantastic. The wide. full review It has been years since I have even tried. The day I received this I was able to sew a skirt and top. I cant say what I like best but just ordered another another one for my elderly friend who has started having some vision issues. The needle threader will allow her to start sewing again without having someone come to thread it for her. That, in and of itself, will make this one of the best gifts I have ever given. I wanted to order more, but Amazon would only let me purchase a limited supply. I personally found the extra presser foot lever to be a. Loved all the extras in the

Project Runway Model. So far, it sews great and is easy to use. Negative The local Brother rep said they could not answer questions for people who bought machines online. They have a class next month, but they were so rude, I will not take the class from them, nor will I buy any supplies from them. I will continue to use Amazon. It is very sturdy yet light in weight. We tried taking up a hem in a pair of jeans. No problem it went through the fabric like butter. It is an all around functional machine for just about any project you want to take on. Great for mending, quilting or dress making. We are going to try sewing some drapes this weekend, but I am sure it will do a great job.

The 59 functional stitching is loads of fun and beautiful. We love the fact that it is not made with a bunch of plastic parts. We also like the guide on the base of the machine to help you keep your fabric lined up properly. We purchased this for our 11 year old daughter who wants to learn to sew.. full review It still works remarkably well, but it is fussy at times and has no extra features or frills. I requested the Brother XR3774 sewing machine as an upgrade, thinking that it would have the versatility and ease of use that would make sewing more enjoyable. She was so excited the day that the sewing machine arrived that she unpacked it, skimmed the quick start guide, and had the machine running within the space of about 45 minutes. She said that she was really impressed with how userfriendly the instructions were, and she was relieved that her familiarity with a really old machine didn't hold her back from using the new one. Within the next 45 minutes, she had stitched up a basic skirt. So she. full review I have a Brother SQ9050 with the larger. Setting were easy to adjust and the threading is very quick. Does a great job on heavier weight fabrics. Brothers machines do more than my Singers ever did. I run a test to see all the different stitches and they are beautiful. I have a CS6000I and just bought a DZ2400 and use them both making quilts. Love Brother! Saying no will not stop you from seeing Etsy ads, but it may make them less relevant or more repetitive. Our support app is only a click away, so download today. If it has, raise the feed to ensure the fabric will move forward. Computerised machines will remind you to do this. This will switch the machine back to Rethread the machine following the threading instructions in your machine's instruction manual. You will also find instructions for your machine online via the Brother solutions centre Note We find that Butterfly and Singer Branded needles are often not compatible with Brother sewing machines and may cause issues with your machine not picking up lower thread. We would recommend using either Organ or Schmetz branded needles. Rethread the machine following the instructions in your manual and ensure that the foot is raised. If there is tension when pulling the thread, then the thread may be unsuitable for machine sewing and should be replaced with machine sewing thread from a reputable brand. It's possible there be a timing issue with your machine. Contact your Brother dealer to arrange a service or contact our customer service team. Make sure the presser foot is lifted before threading the machine. Set your bobbin correctly into the machine. For top loading bobbins, the thread needs to be going around the bobbin in an anticlockwise direction. Use the guides on your machine or refer to your instruction manual. If you have a mechanical machine, check that the foot is lowered before sewing. Computerised machines will remind you to do this. Using thread that does not pull through smoothly can cause thread breakages, poor stitching or damage to your machine. For best results, you should use a good quality, branded thread. The thread should pull through the machine with no tightness. Choose one of the products to easily find your manual.
