Book Descriptions:

We have made it easy for you to find a PDF Ebooks without any digging. And by having access to our ebooks online or by storing it on your computer, you have convenient answers with bushmaster bko manual . To get started finding bushmaster bko manual , you are right to find our website which has a comprehensive collection of manuals listed.

Our library is the biggest of these that have literally hundreds of thousands of different products represented.

Book Descriptions:

bushmaster bko manual

Compressed Air For Paintball It is one of the lowest priced electropneumatic markers available. The BKO utilizes a pneumatic ram to drive the bolt forward open the valve, and a spring return system to bring it back to rest. The result is a fast and easy to maintain marker that gets great gas efficiency. ION Weight 2 lbs 8.8 oz Marker Length 18 in. BPS 1015 I bought because I have been getting back into paintball. All the orings and seals have been replaced by ANS. I went thought the gun to make sure everything was good. I then aired it up and it works great. I no longer play in tournaments or anything, just recball. This gun works great. I switch between this and my alleycat based on who Im playing with. Also worth noting, before I bought this gun I called ICD to make sure they still make rebuild kits for this gun. They still make parts, but most you can find on ebay easily. This is a 2004 model. This gun doesnt have eyes, but I have had 0 chops in the 3 days i have played. Was this review helpful to you. The result is a fast and easy to maintain marker that gets great gas efficiency. ION Weight 2 lbs 8.8 oz Marker Length 18 in. BPS 1015 Be the first to write a review. We have been providing high quality low cost Orings for a couple of years now. We always try to make the customer happy and are more than willing to keep our prices down to pass that savings on to you! No paypal account is required. Rest easy knowing that you are buying from a proven company with over 6,000 ebay feedback. Now Ive got a bunch of rings. BKO is a Indian Creek Design, Inc. BKO. 2004 Standard Model. Assembly Manual The BKO Model paintball gun is relatively easy to assemble. The PRP is a Nelson based Manuals and Technical Information 2004 BKO Manual. Indian Creek Bko Manual. 07. July 2017. George CIE Companion of the order of the Indian Empire COB Companion Of the Bath 3 Jun 2004 Notice is hereby given that this manual is part of the article owned in. <http://cribpointonline.org/cribpointonline/userimages/finepix-s9600-instruction-manual.xml>

Before pressurizing your BKO, check to make sure that you have a The first upgrade you should make for your ICD marker. Bushmaster BKO If your board does not have Version 3.1, please use the appropriate manual for Indian Creek Design Bushmaster Series. 1019 First St. North Nampa ID 83687 Read the entire manual before you prepare your BKO for firing. Safety and safe. Indian Creek Design, Inc., known as indicated in this manual and drawings. Vote in the POLL New Planet Eclipse Geo 4 shooting video First time shooting the Ego LV 1.6 VIDEO Bushmaster B2K That gun never needed a backup, so I mostly lent it others to play with. It was kind of sparatic, sometimes it would work great, other times it. That gun never needed a backup, so I mostly lent it others to play with. It was kind of sparatic, sometimes it would work great, other times it would have random problems, particularly with the pds. These problems tended to be easily resolved, but I ended up selling it only a bit later. Bushmaster B2K Since it is now about 4 years old, many Bushmasters have become cheaper, and depreciated even greater with. Since it is now about 4 years old, many Bushmasters have become cheaper, and depreciated even greater with the end of ICD. However the price may drop, they can still keep up with the best of the guns made even today. The stock board only has semiauto, so the gun lacks ramping as a standard feature. However, many stock features still work well, although a couple of upgrades such as a feedneck and regulator are recommended. In short, Bushmasters are still fine guns, even with the lowered prices. Bushmaster B2K The board only has one mode which is semi. I aired the gun up and did some dry firing. It seemed to shoot nicely, no major kick and not super loud. I went outside to shoot paint and the gun didnt chop at all. After around 600 shots through it, a noise came out and the noid started to leak. I took the frame apart

and realized that it was indeed the noid. <http://ndt-tl.ru/upload/finepix-s9600-service-manual.xml>

I took the noid apart and checked all the orings and put it back together expecting it to work. It didnt. I scrapped the gun and decided to move on. Bottomline Fast but I never really got to test the gun on the field. Bushmaster B2K I love the gun so much I bought 2 of them. Its reliable shoots fast, doesnt weigh much. I love the gun so much I bought 2 of them. Its reliable shoots fast, doesnt weigh much. Bushmaster B2K Bushmaster B2K But if it wasnt for this gun breaking all the time, I wouldnt have been able to learn how to fix most guns in the market today. If you can master fixing one of. But if it wasnt for this gun breaking all the time, I wouldnt have been able to learn how to fix most guns in the market today. If you can master fixing one of these, fixing other guns will be a piece of cake for you. Bushmaster B2K There is no gun more perfect than a b2k. Its basically the shocker of the poppet world in terms of upgrades. Just great. There is no gun more perfect than a b2k. Its basically the shocker of the poppet world in terms of upgrades. Just great. Bushmaster B2K Great efficiency for when it came out, nice milling and plethora of upgrades available, once upgrade it can be a very very smooth shooting poppit. Great efficiency for when it came out, nice milling and plethora of upgrades available, once upgrade it can be a very very smooth shooting poppit with good efficiency 12001500 with upgrades like valve and ram. Again, a marker that evolved into the Promaster and could have kept evolving to be one of todays top end markers had ICD lasted. Bushmaster B2K Bushmaster B2K. Air System You can use High Pressure HP or Low Pressure LP tanks with the Promaster. You can also use an adjustable tank, if you do, setting it to work like a low pressure tank at around 400450psi is a good idea. Barrels It takes any and all Autocockertm or Cockertm barrels. This is the same as the intimidator, matrix, AKA guns and many others.

Board The stock board comes with semi, PSP and NXL modes. You can run it with a 15bps cap, or unlimited shoots as fast as your loader. The stock board is very good, and does not need to be upgraded immediately. If you want to upgrade it any board for the FS7 Freestyles will work. This is the type of board where it is held in place by screws going through the microswitch. Modes are adjusted very easily via dip switches on the board Semi unlimited Semi 15bps capped PSP 3 pulls then ramping as long as you move your fingers unlimited PSP 15bps capped NXL 3 pulls then hold on the fourth for Full Auto unlimited NXL 15bps capped. Dwell is adjusted by a dip switch and trigger pulls. Read the manual! High Pressure Inline Regulator You can swap this out for any inline regulator that you wish. One that works well between 200300psi is a good idea. Low Pressure Regulator the one just under the barrel You can use LPRs from the Bushmaster guns but the spring guide is a slightly different length. You can use it as is, but it may affect performance slightly. Its recommended to use a spring two or three coils shorter if using a Bushmaster LPR. Or wait for specific LPRs to come out. If its not stated to work by the manufacturer then you take your own risk. Solenoid Its a Humphries. The same as used by most top end gun manufacturers. Feed Necks It takes all Bushmaster feednecks. This are similar but NOT exactly the same as impulse and angel feednecks. Some impulse and angel feednecks will fit and work ok, others will strip out and could damage your guns body. You can use one that is for a Impulse of Angel but at your own and your guns risk. The standard neck is sized to use a Halo or a slightly sanded halo. If you want to use other hoppers you may need to use electrical tape to make them fit tight, or get a clamping feedneck which are readily available. Triggers It takes the same triggers as Freestyles.

You can swap them out very easily and choose the pivot point, as well as adjust the feel with three different screws. They work great with force feed loaders. Grips You can use pretty much any 45 style wraparound grips. The stock ones are hogue style with a palm swell. Not the prettiest but they are comfortable. The stock bolt is pretty good though. Eyes The eyes are 3mm breakbeam eyes. They work great with ANY paint. It doesnt matter what colour or brand or shell etc. QEV The gun already comes with a QEV on the ram to help it cycle faster. You need to get one and a macro line kit for your gun to work. Manual READ the manual before using the gun, it is a good manual that tells you

how to look after the gun and change any settings you need to. You can find the manual online here.. Manual.pdf Lube Dow 33 or similar works. Only lube the gun when it needs it. A guide to lubing the gun can be found [HERE](#). Summary of Differences between Promaster and previous Bushmaster guns. no tray new noid in grip new milling ramping board freestyle reg pds standard lower mass bolt QEV Updated ram design Freestyle trigger set up Freestyle detents set up 3mm Eyes Compatible with latest freestyle boards. This is NOT my video, but that of someone elses video. Create one here. You will need. Paintball Buyers Guide. The ICD Bushmaster B2K is a gas efficient, stacktube electropneumatic marker that operates at low pressure so it is very gentle on 10. Safety and safe gun.,,,, Creators are allowed to post content they produce to the platform, so long as they comply with our policies. United Kingdom. Company number 10637289. We cannot guarantee Saturday delivery, even if your shipping is upgraded to express. We do NOT ship orders the same day.

Please allow up to 2 business days for orders to process for example, if you order on Monday, your order should ship out on Tuesday or Wednesday. Express shipping options and any other thirdparty fees are nonrefundable. We cannot be held accountable for any delays caused by the carrier. We encourage all customers to thoroughly review their shipping and billing information prior to checking out to ensure any possible delays are avoided. Most orders ship within 12 business days providing we have the requested items in stock. If we don't have items in stock, our customer service team will call you to discuss shipment options. You will not be charged for any items that are not shipped, backordered items will only be charged once they have been dispatched. Special order items are drop shipped from the distributor or shipped by The Rike via thirdparty freight carriers depending on destination. When you place an order, we will estimate shipping and delivery dates for you based on the shipping option you choose. Depending on the shipping provider chosen, shipping date estimates may appear on the shipping quotes page. Once you place your order, you will receive a confirmation email to the email address you provided upon checkout. You will be charged a set fee and we will refund the difference upon completion of the transaction depending on how much actual shipping charges are. Tracked Parcel and Express service are also available. Please use the Shipping Calculator on the Cart page to find estimates based on your location. Additional import, customs, and sales taxes may be added separately in accordance with your state or countrys specific requirements. Standard International Shipping orders typically take 2 weeks for delivery. We are not responsible for delays caused by the customs department in your country. For further details of the charges, please contact your local customs office.

Click on the check out button and you will see the Free Shipping option when choosing those items. Applicable rates apply. No tracking is available for Standard International Shipping Orders. It is the customer's responsibility to track the package and be aware of its whereabouts. It is the responsibility of the client to follow tracking numbers which are emailed prior to packages leaving our warehouse. This is due to a minimum change of address fee charged by nearly all courier and freight companies. Billing information will also need to be reverified if you are changing your delivery address. Most packages are delivered to the mailbox or front door of the address provided, however, it is up to the delivery courier to decide if the package is safe being left in the open. If they deem it unsafe, they will hold the package at a local post office or reschedule another delivery. Our best recommendation is to input a shipping address where you know you or someone else will be available to accept the package a work address or a friends address. You will accept the delivery and note on the delivery receipt for any damages or concerns. If the item is damaged beyond the point of being in working or usable condition, please refuse delivery and immediately notify The Rike. We will work with the shipping provider to replace the item for you. You are responsible for any concerns, issues, or charges for the shipments and agree to hold The Rike, its suppliers, and its

vendors harmless. The Rike is a third party in the shipment of most of the items it sells. The Rike will willingly assist you with the filing and handling of the claims based on your needs and requests. All orders are therefore insured for the value of the shipment by the thirdparty service. If you call to report an item damaged in transit we do not consider the report official until we have confirmation of damages and have sent you a confirmation email.

You agree to cooperate with problem identification and correction efforts. If you fail to return their call and an appointment has not been set up for the delivery, the shipping company will contact us to make contact. Packages must be shipped via a traceable method such as UPS, USPS, Fedex or insured parcel post for your protection and to ensure prompt delivery. The original shipping and handling fees are not refundable. All returns will be credited to the original form of payment. Our return address is printed at the top of the packing slip for your convenience. We cant guarantee that we will receive your returned item and cannot refund returned orders which we dont receive. Used equipment, custom or manufacturedtoorder items, mishandled or misused equipment, and items that are not in resalable condition are ineligible for returns. Approval of return requests is at the sole discretion of The Rike. Shipping costs are nonrefundable. Any item damaged while being returned to The Rike is your responsibility. The Rike's customer service and accounting staff will work hard to complete the process as quickly as possible. During certain highvolume times of the year, processing times may be longer. Once completed, you will be notified via email. Return shipping must be paid for by the customer and may be reimbursed at our discretion. Duties, taxes and shipping expenses will be the responsibility of the customer. If your package is sent to us collect, it will be refused and returned to you. Upon inquiry, We will confirm the delivery to the address provided, date of delivery, tracking information, and shipping carrier information for the customer to investigate. Exchanges if applicable Contact us for arrangement and simply return your original items, and place a new order. We will ship your new order immediately, reducing wait time for replacement items. Once we receive and process your return, we will issue an immediate credit.

Customer is responsible for all return shipping costs unless the item arrives DOA or DAMAGED. Once the item is received back to our warehouse a technician will verify if defective. Please allow 72 hours longer during Holiday seasons for this process. Once verified as defective a Replacement or Refund of the SAME item will be issued free of cost to the customer. If item is returned free of defect and in working condition, customer is then responsible to have item shipped back to them. We represent innovative quality products and marketing concepts that exceed our customers expectations while anticipating their needs for tomorrow. We strive to be a trustworthy company based on strong values and to be the leader in our markets by placing the customer first. TheRike Inc. holds the relationships with its customers, suppliers, employees, and community in the highest regard and will provide for a secure future with growth opportunities. If you have any problems with your order, please contact us and we will do our best to make you satisfied, please do not leave negative feedback before we resolve your problem. We guarantee that your issue will be solved quickly. As long as you are happy with your purchase, please leave us a positive feedback. Your feedback is very important to us it affects our search placement on eBay. We will leave a positive feedback for you in return automatically once we receive your feedback. Therefore we do guarantee that the item featured in this listing will be covered by the manufacturers warranty or support. We specifically disclaim any implied warranties of title, merchantability, fitness for a particular purpose and noninfringement. Customers should satisfy themselves that any item choice made is suitable for their intended purpose or use. We pride ourselves on our customer service. In the rare event that you have a problem with your item, please contact us and well be happy to help. How we use your information The Rike Inc.

You may receive email marketing communications from us in relation to your visit to our site. Free shipping, too. Louis, MO 63132, USA. My friend is having difficulty deciding whether he should by a

Bushmaster LCD 2K Evil Omen or an Impulse I really know very little about any of them. Im telling him to go for the Omen. It really is quite simple, and isnt hard to understand at all each time you turn the velocity up, turn your recock pressure down. But if you can get ahold of a newer bushmaster that would be the best bet imo. Each gun has a decent upgrade path as well. The omen has the PDP chip Awesomness!!!!, the imp has WAS, and bushies can be vaporized and can have chaos boards installed. My friend is having difficulty deciding whether he should by a Bushmaster LCD 2K Evil Omen or an Impulse I really know very little about any of them. Im telling him to go for the Omen. With the PDP chip or the new board coming out after Xmas, it is adjustable to 25bps and has debounce down to 1. Its light, efficient, and the Cam system is pure genius. If you read the manual and LEARN the marker, you will never have a problem. No chops, just a great marker. Not to mention, Evil has a full lifetime warranty on all of their Omens. IF something goes wrong, they will either send you the part or you can send the marker in via RMA for free. More upgrades than either gun, its not a blowback. and WAS. More upgrades than either gun, its not a blowback. and WAS. does having more upgrades make it a better gun. Id put the PDP Chipped Omen up against any of the electros and with a properly set trigger its just as fast as anything else on the field. But I guess, I dont understand how it will smoke the other guns only because it has all sorts of upgrades. Now bear with me, I am a bit Omen bias Omen Has one of the best regs stock, in the detonator. Impulse Maxflo Ive never been crazy about them. Vision isnt stock. Alot more money im going by if you were to buy new here.

Not to mention, I thought my buddies stock frame was HORRIBLE. Bushmaster I dont have much experience with them but from what I gathered, they are pretty crappy out of the box they need some upgrades to really bring out their potential. Just my 2 cents. I would agree that out of the box there not all that. Stay away from BKO unless price is real issue. Serial number is up to over 40,000 on Impulse now. I doubt that they could possible be anything but good with those numbers selling. I love mine, but yes it is pricey off the shelf. If you enjoy upgrading its the obvious choice, upgrades galore, everywhere you go. That may be a money pit for some. You said this friend was looking for simplicity due lack of marker maintenance skills, he should probably get a mag. Anyone on here will tell you they cant be beat on durability and ease of use. Just one was way too much. For effectiveness on the field its a wash they all rip. I own a BKO that has not given me any issues I use it as a loaner. My friend Chris just got a whole crapload of upgade parts for his omen for free. The are acting very Tippmannish with thier customer service. Impulse has my vote. i think bushys are ugly It doesnt need any upgrades. The only thing that needs is a new barrel and maybe a clamping feedneck thats all. Oh and wait for the B2k5 i saw it at the world cup and it is very very sweet. All rights reserved. Click here to submit a question.

How many people If this doesnt This makes you These people will You will find that most teams, If you spend all day playing a Another thing you want to do There is nothing You also want to make Tournaments It will also help if you get Talk to the refs, a lot of times Things like not overshooting, I remember You might want to check You win some, you lose some, thats I know it sounds like It is completely However, I cant figure I mean like parts, brands of Also, I cant decide whether or It reduces There are no problems with running The air will be delivered to the The only problem that you want These are just a few things We were wondering You may want to put together Diablo will sponsor Another way is to Gaining a few partial sponsors Create a web site and use it to acknowledge Do not expect it to happen over Also if you could tell me The decision I play front so I I would select the 14 inch if those are Some players use longer barrels to The only real upgrades It has worked well so far. There If you go from our homepage If you get a delrin bolt you The material absorbs liquids and Since we are on the subject When you oil any gun with a I am not sure I understand If you are using a preset nitro All of our guns are setup this way. There is a video on the site where You also need to get Solder one end of Make sure you get good connections Cut the wire going to Run the intelifeed wire through your Your intelifeed I think the Every time you If you watch

the video The Halo is faster However, I have never been able to Here are the ones There may be others out there High Pressure Reg Macdev Gladiator We use this reg on 2 of our guns Low Pressure Reg Macdev B2K2 The LPR kit from Macdev This makes The Macdev low pressure regulator is The kit also comes The gauge will tell you Valve Macdev Red Valve. This Bolt Tantrum Bolt. This is We only have one This bolt is amazing and unlike most This grip also feels as if Board ICD Tourney board.

The We have the very first version of LCD ICD LCD Display. This It is especially helpful The LCD display is on the back These have Barrel Dye Boomstick. I know We shoot Diablo Blaze unless We rarely have When we do have issues with brittle As far as how to coach If there is If there is nobody You can also try looking back Try having a good They may have been missing some I have found the You should If you call JT and Once we got our sponsorship with National We got our team logo, I have shot them both and found It really comes down You only need a new You also dont need I dont know Put a small amount of grease Also put some Do not lubricate If it is the stock bolt, it is made Be careful not to lose the spring Put a very small amount of grease There is a piston inside there Again, put a small These instructions It is recommended to clean your You need to hook a wire long Now you need to hook another Make sure to run some heat shrink Solder the wire It does have a Reassemble your gun at this There are a few things you You could even enter Remember, paintball If the problem The number of players on a team In three man tournaments you can normally In regards to the You may not win, If you decide to take this approach, For instance, if you play in an. It will not affect performance It will not affect performance When Smart Parts began producing all their markers with this barrel thread it became known as the Smart Parts Standard barrel thread. In most cases, this barrel thread will be referred to as Ion. Thus, the Autococker barrel thread is the most common industry barrel thread for midrange to highend paintball guns. Many manufacturers renamed the thread for marketing purposes so you will sometimes see AC thread referred to as Mini barrel thread, Timmy barrel thread, or TM15 barrel thread. Only a singlecolor i.e. no fades, splashes, etc.This marker also had the same style of trigger frame a.45 style, with an aluminum blade trigger.

The BKO also used the same electronic guts as the B2k the 8200 board, capped at 10bps, in a semionly firing mode. The BKO also had the same distinctive highrise feedneck as the Bushmaster. The BKO benefited from industry standards, however, as ICD was starting to move to a standard ASA threading for the highpressure regulators, instead of the customstyle that was offered on early bushmasters. Curiously, ICD chose to use a different style of mounting for the lowpressure regulator, opting for a much smaller one that sits between the trigger frame and the highpressure regulator. The bolt in the original BKO was the same as the bushmaster, and barrel threading was also the distinctive ICD threads. The item you see in the place where you would expect an LPR to sit is actually a volumizer, although many contend it was never necessary. The solenoid in the BKO is also significantly different. The bushmaster line uses a threeway solenoid; the BKO s solenoid is only a twoway model, given that the ram is springreturned. Additionally, the ram housing in the original BKO model is not rebuildable, causing significant frustration on the part of many users. The BKO operated at psi compared to the B2K series marker that operated at psi. Another key difference, which changed in later models, is that the 02 BKO used cocker detents. Rounding out the out of the box package was a 700psi gauge on the front block, a onepiece black aluminum 12 barrel. Page 1 of 5 2 2002, Second Edition Changes to the second generation BKO included a new diamond milling pattern in both the upper and lower tubes of the main body. ICD made some changes to how the highpressure regulator was adjusted at the factory, since there were a significant number of people who had issues with preset tanks the LPR would shutdown if it was overpressurized. The board inside the marker was still the 8200, as per the prior model, however this board includes a code change that upped the semionly rate of fire to 14bps.

ICD also began offering the option of either the standard.45 frame, or the newer style referred to by many as the clamshell frame, although it was not truly a clamshell frame. This frame later became widely known as the 2k3 Frame. The last major change for this year was the ball detent. Previously, the BKO used a cockerstyle screw in Teflon detent. ICD changed the detent to the same style implemented in the bushmaster lineup, which was essentially a small O ring tucked inside a short metal sleeve. These O ring style detents would later prove to be a major problem, with many replacing them with flat rubber washers which were much more durable. Page 2 of 5 3 2003 Not a lot changed for the 2003 model year, however, what did change was quite noticeable. The 03 BKO first generation had a newer body style the camber on the upper and lower tubes was still the same, however, there was no milling pattern into the meat of the body. The newer 2k3 Frame style trigger frame became standard for the BKO this year. One of the largest changes was the 9300 board. Unlike the 8200 board, this electronics package did not offer the same adjustability that the 8200 did, however, it was necessary because of the other major option that was available for the BKO this year Paintball Detection System, or PDS for short; as you likely are aware, this is the method by which the electronics would override a user's desire to fire, since it would mean breaking paint. Many BKOs were sold without the PDS option. The 9300 board is still in wide use, as of the writing of this document. It was originally developed for the Bushmaster line, and was then brought into the BKO product line. However, the bushmaster was a more reliable platform, and the board's stock programming for 33.3 bps had to be dropped down to 18bps. This was a moot point, though, as the BKO had a hardware limitation due to the springreturn nature of the ram, it simply wouldn't cycle faster than about 18 bps.
