Egy canon MV830E kamerának az a hibaja, hogy kazetta nelkul behuzza a kaz. Kazettával azonban hiába nyomom le a kazettat, par masodperc utan sipol, es ismet kidobja. Tud valaki valami okosat mondani Koszonettel. Megosztom egy javitasi tapasztalatomat. Vettem nagyon olcson egy cim beli fenykepezogepet, hatha oda tudom adni a 7 éves gyermekemnek. Tartottam tole, hogy CCD hibas, de beleugrottam, Bekapcsolni lehetett egy pillanatra, de az akku le volt hervadva. Sajnos beigazolodott a felelmem. Ez a gep nem jutott el a visszahivasi akcioba, amit a Canon hirdetett anno. Ennek csak fekete kepek tarolodtak a kartyajan. A visszahivasi dokumentumban szerepelt, hogy bizonyos homersekleti es paraviszonyok hozzak elo a meghibasodast, ami a CCD belso kapcsolodasat szakitja meg. Ez az en olvasatomban forrasztasi hibát jelentett. Nosza, egy kiserletet meger. Youtube video alapjan szetszedtem. Fontos, hogy a 3db rogzito csavar poziciojat, es kitekeresi korbefordulasok szamat fel kell irni, mert a CCD lapka ezekkel van beallitva, ide kell visszaallitani. Annak ellenere, hogy nem oncseret vegeztem, csak olmos forraszanyaggal atforrasztottam, lett kepe, sot kivalo kepe lett a fenykepezo gepnek.

- **canon powershot sx100 is repair manual, 1.0, canon powershot sx100 is repair manual.**

Neha, az esetek 5%ban, atmenetileg belilulnak a kepek, de ezt annak tudom be, hogy nem vegeztem alapos munkat az atforrasztással. Valoszinu, ha teljes oncseret vegzek, ez is eltunik. Az akku sajnos kuka, egyenlore labortaprol jaratom. Gabor Canon PC 1169 leesett F18 hibakodot ir Hello! Ez t a kis keszuleket kivittek egeszen a Niagarához, hogy ott leejthessek es sikerult nekik. Meg volt szorulva az objektivez ezt szetszedtem kipiszkaltam a letort darabokat. Kimostam a mechanikus reszet, majd osszeraktam. ES igy kint 2Vrol meghajtva kitunoen mukodik. Ha osszerakom akkor elsonek elindul kitolja az obit, majd F18t ir ki. Mi okozhat ilyet Nezttem hozza szervizkonyvet sajnos nem talaltam. Esetleg ebben tudnatok segiteni Koszi, udv. Izirajder Canon PowerShot A75 nincs kep Sziasztok. Haver megkinalt egy ilyen egyebkent rossz, fenykepezogeppele. Minden megy, csak kep nem latszik a kijelzon. Menu mukodik, fenykepezne is, a nagy fekete semmit, vaku jo, zoom jo. Szerintem CCD gyanus, CK11102 lakozik benne szetszedtem. Velemenyek Beszerezhető ez valahol. Recommended Software File Name Date File Size Optional Software File Name Date File Size Recommended Manuals File Name Date File Size Optional Manuals File Name Date File Size The Product purchased with this limited warranty is the only PowerShot Digital Camera to which this limited warranty applies. Warranty exchange or replacement does not extend the original warranty period of the Product.

The sole warranty, if any, with the respect to such nonCanon brand items is given by the manufacturer or producer thereof. This limited warranty covers all defects encountered in normal use of the Products, and does not apply in the following cases A Canon Customer Care representative will attempt to diagnose the nature of the problem and correct it over the telephone. If the problem cannot be corrected over the telephone, you will be asked to follow the applicable procedures for MAILIN SERVICE. Note that a dated proof of purchase is required at the time of service. MAILIN SERVICE is a program under which your Product is repaired by a Canon U.S.A. or a Canon Canada authorized service center for the Product. You will be given the name, address and phone number of an authorized service center. It is your responsibility to properly package and send the defective Product, together with a copy of your dated proof of purchase, a complete explanation of the problem and a return address to the authorized service center at your expense. Do not include any other items with the defective Product. The Product covered by this limited warranty and proven to be defective upon inspection will be repaired and returned to you without charge by the authorized service center. Any Product received by the authorized service center that is not covered by the limited warranty will be returned unrepaired, or at the discretion of the authorized service center, you may receive a written estimate of repair at such cost as the service center may establish from time to time. Scroll down to easily select items to add to your shopping cart for a faster, easier checkout. Visit the Canon Online Store Provides uninterrupted power for shooting or downloading. Effectively doubles the flash range of the camera. Comes with mounting bracket. The cable connects to your camera and to the USB port on your PC or MAC Computer.

Comes standard with the EOS 1Ds Mark III, 1D Mark IV, 1D Mark III, 1Ds Mark II, 1D Mark II N, 1D Mark II, 5D Mark II, 7D, 5D, 50D, 40D, 30D, 20D, 10D, Digital Rebel XTi, Digital Rebel XT and Digital Rebel. Please see Compatibility tab for compatible models. You can use SD memory cards, SDHC SD High Capacity memory cards, MultiMediaCards, MMCplus cards and HC MMCplus cards in this camera. Please Read Getting Started.7 Preparations. Battery Cover Lock Slide the cover. Install two batteries. Attaching the Wrist Strap It is recommended to use the wrist strap to avoid dropping the camera during use. Preparations. Battery Cover Lock Slide the cover. Insert the memory card until it clicks into place. Back Open the cover. To Remove the Memory Card Push the memory card with your finger until the memory card clicks and then release it. Preparations. Set the date and time as shown in Steps 3 and 4 in the explanation below. Buttons Press the power button. Buttons Press the Playback button. Hold down the Use the Press the button. Select a shooting mode. 1. Review Recorded images are displayed on the LCD monitor for approximately 2 seconds immediately after shooting. You can also use the following methods to continue displaying the image immediately after shooting so that you can check it. Keep the shutter button pressed fully. The last recorded image will display. Select a shooting mode. 1. Set the mode dial to 2. Confirm that the camera is set to Standard. Aim the camera at the subject. Do not touch the microphone while recording. Press the shutter button fully to shoot. Use the press the button. You can also select an image by turning the control dial. Please note that erased images cannot be recovered. Exercise adequate caution before erasing an image. Button Canon Brand Printers. Follow the onscreen messages to proceed with the installation. Slide the camera's terminal cover to the left to open and insert the interface cable all the way into the connector.

Camera Window will display. Preparations for downloading images are now finished. Please proceed to the Downloading Images Using the Camera section p. Preparations for downloading images are now finished. Only JPEG images can be selected for downloading as wallpaper for a computer. The option selected with the when the camera's power is turned off. The previous setting will be in effect the next time the Direct Transfer menu is displayed. Some accessories are not sold in some regions, or may no longer be available. You can perform the following operations when you turn the control dial. Button FUNC. Operation Vol. Selftimer Vol. Shutter Volume Print Menu Reference Menu Item Page. As this setting will be stored to memory even when the power is turned off, to print using an

image size other than connection method cannot be changed while connected to a printer. The LCD monitor will not switch to the Detailed display or Focus Check display while in Magnified display p. During flash photography, however, the camera automatically readjusts the ISO speed, shutter speed or aperture setting to an optimal setting, which may cause the playback information to differ from the displayed information. A sound file in a format other than the WAVE format is attached or the file format is not recognized. JPEG image not conforming to Design rule for Camera File System Standards. Please note that formatting initializing a memory card erases all data, including protected images and other file types. The displays when reaching the maximum zoom factor without image deterioration. Press the 1. For details, please see the user guide for each product. Setting the Image Stabilizer Function Shooting Mode The lens shift image stabilizer function allows you to minimize the camera shake effect blurred images when you shoot distant subjects that have been magnified or when you shoot in dark conditions without a flash. Set the mode dial to Produces a soft effect when photographing people.

Optimized for shooting landscape scenes which contain both near and far subjects. Set the mode dial to Select a shooting mode. 1. Use the control dial to select a shooting mode. Allows you to capture people against the backdrop of an evening sky or night scene. Shoots without making people appear dark near water or sand where reflected sunlight is strong. Captures fireworks in the sky sharply and at optimal exposure. The recording time will vary according to the capacity of the memory card you use p. 200. Standard You can select the recording pixels and record until the memory card is full when a super highspeed memory card is used, such as the recommended SDC512MSH. This is effective on ski slopes and the beach when the contrast is too strong between the subject and background or where there are both light and dark areas in the scene and it is desirable to adjust the exposure. Select the number of recording pixels. 1. Press the 2. Use the and the change the option. The overlapping seams of several adjacent images can be joined into a single panoramic image. You can freely configure such settings as the ISO speed, exposure compensation and white balance. Set the mode dial to Shoot. Faster shutter speeds allow you to catch an instantaneous image of a moving subject, while slower speeds create a flowing effect and allow you to shoot without a flash in dark areas. When you set the aperture value, the camera automatically selects a shutter speed to match the brightness. Selecting a lower aperture value opening the aperture allows you to blur the background and create a beautiful portrait. Therefore, even if an aperture value is preset, the aperture value may automatically be reset to match the synchronized flash speed. Aperture Value Display The larger the aperture value, the smaller the lens aperture. F2.8 F3.2 F3.5 F4.0 F4.3 F4.5 F5.0 F5.6 F6.3 F7.1 F8.0 Safety Shift With. Set the mode dial to Configure the shutter speed and aperture setting. 1.

Use the button to select shutter speed or aperture. Continuous You can shoot Approx. Recording will cease when the shutter button is released. Accept the setting. When shooting at night or under artificial indoor lighting, this function reduces the effect of background darkening when the flash fires. Frame color Displays the area of the image shown at the bottom Orange right. The camera only focuses when the shutter button is pressed Single halfway, conserving battery power. The camera is continually focusing on whatever it is aimed Continuous at even when the shutter button is not pressed, allowing you to shoot without missing opportunities. You can set the AF frame in the following ways. You reduce the area used to set the focus when you reduce the AF frame to match a small subject or to focus on a particular portion of a subject. Cancel the manual focus mode, then change the AF frame setting. Using the Manual Focus in Combination with the Auto Focus Safety MF First, manual focus is used to roughly focus, then from that focus position the camera automatically focuses more accurately. This is effective when the contrast is too strong between the subject and background or when a subject is backlit. Aim the camera at the subject on which you wish to lock the exposure. Raise the flash. mode, press the flash on. Aim the camera at the subject on which you wish to lock the exposure. Shooting Mode ISO Speed. If the camera is set at set by the

camera will be displayed when pressing the shutter button halfway or in playback information. Reducing Camera Shake When Shooting Auto ISO Shift Shooting Mode When the camera shake warning icon . Press and hold the shutter button halfway, then press button. Press the shutter button all the way down press fully. Various Shooting Methods. Adjust the exposure compensation to a negative value to avoid making the subject too bright in night shots or when shot against a dark background. Spot Change the metering mode. 1. Press the 2.

Use the and the option. 3. Press the See Functions Available in Each Shooting Mode p. 222. Appropriate for standard shooting conditions, including backlit scenes. When the change the white balance using a setting appropriate for the light source. Auto Settings are automatically set by the camera. Day Light For recording outdoors on a bright day. The correct white balance may not be obtained when the exposure setting is incorrect image appears completely black or white. Shoot with the same settings as when reading the white balance data. My Colors Off Vivid Neutral Sepia Custom Color Select a My Colors setting. 1. Press the 2. Use the and the the option. You can combine the flash exposure compensation with the camera's exposure compensation function for balanced exposure of the background when doing flash photography. Configure the flash output setting. 1. Press the 2. Use the and the option. Helps Grid Lines confirm the vertical and horizontal positioning of the subject. It then regulates the optimal white balance, exposure and focus for vertical photography. Setting the Day or Time for Automatic Folder Creation. You can select how the file number is assigned. A number one higher than the last one recorded is assigned to the next image. Up to 2000 images can be saved into a single folder. To Return to Single Image Playback Press the zoom lever toward Switching between Sets of Nine Images The jump bar will display if you press the. Moreover, as you can change the display magnification and switch images, you can easily check facial expressions and whether a subject's eyes are closed. Jump Shot Date Jump to Folder Jump to Movie Jump 10 Images Jump 100 Images. Play the movie. 1. An icon will display when a printer is connected. See Print the Direct Print User Guide for details. Play Play You can use the Slow Motion button to speed up playback. No transition effect. The displayed image darkens and the next image gradually brightens until it is displayed.

Press the button to have the previous image display from the left and the button to have the next image display from the right. The LCD monitor displays each image for approximately 3 seconds. Red eyes may not be automatically detected in some images or the results may not turn out as you intended. Examples Faces near the screen edges or faces that appear extremely small, large, dark or bright in relation to the overall image. The uncorrected image is stored. Although you can apply redeye correction any number of times to an image, the image quality will gradually deteriorate with each application. Delete the frame. 1. Note that erased images cannot be recovered. Exercise adequate caution before erasing an image. Protected images cannot be erased with this function. Print settings cannot be set for movies. Images are printed in order according to the file number. A maximum of 998 images can be selected. Refer to the Software Starter Guide for instructions on how to transfer images to your computer. The settings used on the camera comply with the DPOF standards. Turn off the camera and the TV. When the power is turned on "Card locked!" message appears. The SD memory card's or SDHC memory card's write protect tab is set to "Write protect". The lithium date battery charge is depleted. Sometimes appears when shooting a bright subject, such as the sun or other light source. appears. A slow shutter speed has likely been selected because of insufficient lighting. appears. Consult the nearest Canon Customer Support Help Desk. Slide the write protect tab upward p. 184. Shoot with the subject at the correct The subject is hard to focus Subject in recorded image is too dark. Insufficient light for shooting. Raise the builtin flash to The subject is underexposed because the surroundings are too bright. Image contains noise. ISO speed is too high. White dots appear on the image. Light from the flash has reflected off dust particles or insects in the air.

This is particularly noticeable when shooting using the wide angle or when you increase the aperture value in the aperturepriority. The memory card's performance has dropped. Recording images to memory card takes a long time. Memory card was formatted in another device. Lens will not retract. Shooting movies The recording time may not display properly or shooting may stop unexpectedly. There is insufficient free space in the camera's built in memory. Zoom does not operate. Zoom lever was pressed while shooting in movie mode. Playback Cannot play back. You attempted to play back images shot with another camera or images edited. Battery capacity drops due to low ambient temperatures. Battery terminals are dirty. If using Canon AAsize NiMH batteries As the batteries have not been used for over a year, their recharging capacity has decreased. Battery life has been exceeded. Incorrect video system setting. Shooting in Stitch Assist mode. Printing with a direct print compatible printer Cannot print The camera and printer are not properly connected. The printer power is not turned on. Memory card full. Replace both batteries immediately with unused AAsize alkaline batteries or fully charged Canon AAsize NiMH batteries. Also refer to Battery Handling Precautions p. 182. No image. No images recorded on memory card. In addition, sound cannot be played back. Cannot modify image You attempted to resize or perform red eye correction on a movie or an image recorded with another camera. If this message continues to display, contact your Canon Customer Support Help Desk as there may be a problem with the lens. Always ensure that the camera is operated correctly. The safety precautions noted on the following pages are intended to instruct you in the safe and correct operation of the camera and its accessories to prevent injuries or damage to yourself, other persons and equipment. Please consult your camera distributor or the closest Canon Customer Support Help Desk.

Warnings Equipment Appendix. Do not cut, damage, alter or place heavy items on the power cord. Use only recommended power accessories. Remove the power cord on a regular periodic basis and wipe away the dust and dirt that collects on the plug, the exterior of the power outlet and the surrounding area. The compact power adapter is designed for exclusive use with this equipment. Do not use it with other products. There is a risk of overheating and distortion which could result in fire or electrical shock. Be careful not to bump or strongly push the end of the lens. The abovementioned could lead to injury or damage the equipment. Be careful not to cover the flash with your fingers or clothing when shooting. The flash may be damaged and emit smoke or noise. The resulting heat buildup could damage the flash. Camera operating time may shorten at low temperatures when alkaline batteries are used. If the battery terminals are soiled with oil from one's skin or other dirt, the number of recordable images may be considerably diminished, or the amount of time the camera can be used may be reduced. At low temperatures, battery performance may be reduced and the low battery icon Under these conditions, restore the battery performance by warming it. Do not bend them, apply force to them, or subject them to shocks or vibration. Please do not attempt to charge other type of battery. Do not mix batteries with different purchase dates or different charge states. If you are purchasing new batteries, look for Canon AAsize NiMH batteries. Leaving batteries in the camera or charger may result in damage from battery leakage. When not in use, remove the batteries from the camera or charger and store them in a cool, dry location. Use the following procedures to affix the camera and HighPower Flash to the supporting bracket. Fasten the attachment screws securely so that they do not loosen. Failure to do so may lead to the dropping of the camera and flash resulting in damage to both.

Please purchase a lithium coin battery CR1220 and replace it as follows. Replace the battery holder.If dirt remains, contact the closest Canon Customer Support Help Desk as listed on the customer support list supplied with your camera. Subject to change without notice. PowerShot SX100 IS Camera Effective Pixels Approx. 8.0 million Image Sensor Lens Digital Zoom LCD Monitor AF System Focusing Range From end of lens Exif Print is a standard for enhancing the communication between digital cameras and printers.
